FULL-STACK WEB & MOBILE APP DEVELOPER | SOFTWARE ENGINEER

Pasig City, Philippines | 0921-710-5661 | jmm.maagad@gmail.com | LinkedIn Profile | Portfolio Website

WORK EXPERIENCE

Full-Stack Web Developer & Mobile App Developer | HMR Philippines, Inc. (Full-time) **2024-Present | Mandaluyong**

- Managed end-to-end deployments from staging to production using React.js, Vue.js, and Laravel PHP; resolved user bugs and optimized database queries, reducing support tickets by 35%.
- Engineered the Extended Retail Inventory Management system across web and mobile platforms with integrated CRM, payment processing, sales reporting, POS, and warehousing modules.
- Integrated Google Gemini AI to automate affiliate ID verification, accelerating user onboarding and decreasing compliance overhead.
- Revamped UI/UX for Envirocycle, HMR.ph, and core e-commerce features, launching a new affiliate marketing commission structure.
- Built RESTful APIs for seamless synchronization between internal infrastructure and third-party services.
- Optimized MySQL schemas and indexing, significantly improving API latency and lowering server load.

Live Simulcast Technical Support | Harrington's Auction / HMR Partnership **Sept 2025 | Mandaluyong**

- Processed high-volume incoming auction data in real-time, ensuring seamless synchronization during live simulcasts.
- Coordinated platform data flows between auctioneers and streaming infrastructure to maintain system uptime under pressure.
- Assisted in presales activities including proof-of-concept design, solution scoping, and functional workflow mapping.

Frontend Web Developer | Innovators Legacy (Freelance) **Oct 2023 - Dec 2023 | Bulacan**

- Architected the Barangay e-Request System, enabling citizens to lodge and track municipal service applications online.
- Designed responsive, accessible frontend interfaces utilizing SASS and modern CSS practices; delivered within 3 months.

Frontend Web Developer & Graphic Designer | Highly Succeed Inc. (HSI) **Feb 2024 - May 2024 | Mandaluyong**

- Converted Figma UI designs into clean, maintainable React.js code following Agile/Scrum workflows in Jira.
- Configured user administration features including role-based authorizations, access permissions, and audit logs.
- Designed landing pages and digital marketing collateral aligning with brand identities and conversion metrics.
